Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Election/Restrictions

Applicant's election without traverse of Group I, claims 1-6 in Paper No. 9 is acknowledged.

Priority

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Drawings

Figure 25 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Specification

The abstract of the disclosure is objected to because the length exceeds 150 words. It should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. Correction is required. See MPEP § 608.01(b).

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4 and 6 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Sanyo Electric Co. (Figures 16 to 19 and Figures 23 to 27) (DE 197 53 690 A1).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 5 is rejected under 35 U.S.C. 103(a) as being unpatentable over Sanyo Electric Co. (Figures 16 to 19 and Figures 23 to 27) (DE 197 53 690 A1) as applied to claims 1-4 above.

- Regarding claim 5, Sanyo Electric shows all the features except a width of a part of said carriage chassis in the recording medium loading direction is smaller than a width of said pickup in the recording medium loading direction, and a part of the

Art Unit: 2653

recording medium accommodated in said recording medium accommodation unit is situated in an area formed by setting the width of a part of said carriage chassis smaller than the width of said pickup.

It would have been obvious to one of ordinary skill in the art at the time the invention was made to change the shape of the carriage chassis so that the width of a part of the carriage chassis is smaller than a width of the pickup in the recording medium loading direction and a part of the recording medium accommodated in said recording medium accommodation unit is situated in an area formed by setting the width of a part of said carriage chassis smaller than the width of said pickup.

The rationale is as follows: One of ordinary skill in the art at the time of the invention would have been motivated to change the shape of the carriage chassis as noted above because the shape change is anything more than one of numerous configurations a person of ordinary skill in the art would find obvious. *In re Dailey*, 149 USPQ 47 (CCPA 1976).

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure:

- Matsumoto et al. (US 6,459,674 B1) is cited to show a disc changer apparatus with a vibration free turntable.
